

October 30, 2020

Dear Dr. Carter:

We respectfully submit our manuscript "Feasibility of the Children's Health Questionnaire for Measuring Outcomes of Recreational Therapy Interventions in Autism Populations" for publication in the *Therapeutic Recreation Journal*. The current masked manuscript is 14 pages (3665 words), excluding references and tables. The manuscript includes 3 tables.

The authors have no conflicts of interest. This study was supported in part by an NIH Clinical and Translational Science Award grant (UL1 TR002366) awarded to the University of Kansas Medical Center, an internal Clinical Pilot Research Grant Program of the KUMC Research Institute and the School of Health Professions, and a grant from the Recreation Therapy Foundation.

All research was conducted in accordance to ethical standards for human research at the University of Kansas Medical Center.

Sincerely,

Lisa Mische Lawson, PhD, CTRS, FDRT
Professor
Therapeutic Science PhD Program Director
